## **French Tech at the heart of the 2017 NIGERIA AGROFOOD exhibition**

For the third time, Adepta organizes The French Pavilion at the 2017 Agrodfood Nigeria show:  
a perfect opportunity to showcase 15 French companies

French participation revolves around **Adepta**, a network of 240 French companies which manufacture and supply equipment, technologies and inputs for agriculture, livestock and agrifood production. Through its members, Adepta is a unique showcase of **French technology and know-how** in these industries. Adepta connects the expertise of its members with the needs of Nigerian entrepreneurs.

### **French solutions for Nigerian requirements**

As Africa's largest economy, Nigeria has a promising agricultural potential. Agrofood Nigeria 2017 is a perfect opportunity to meet with **French leading manufacturers of machinery for agribusiness**. The French Pavilion represents the best know-how and latest technologies in the bakery, food-processing, packaging and livestock industries.

Part of the French Pavilion will be located in the brand new Hall 2 which will be dedicated to agriculture; this is where France will demonstrate the expertise of its AI and animal feed specialists.

### **French Live Bakery**

Throughout the exhibition, an entire **operational industrial bakery line** will be equipped with French equipment, producing bread all day under the French Pavilion. Six exhibitors installed this bakehouse using the equipment they manufacture in France: kneading machine, bread slicers, proving cabinet, ovens racks, etc. All visitors are welcomed to enjoy live bakery demos during the entire show.

The quality of the bread produced onsite will be a fine example of how Nigerian raw materials combine perfectly with French equipment.
